QUALITY POLICY

As Titanit, our basic task is to provide superior quality products and services to fulfil the requirements and expectations of our customers and business partners. We recognize that quality is an inevitable factor in achieving targets of the company and attach great priority to quality in all phases throughout our processes.

We consider it our most basic goal to meet customer satisfaction. To this end, we record, evaluate and timely respond to all feedback from our customers. For us, customer feedbacks are opportunities for improvement in the road to our target.

- All our employees and stakeholders work in cooperation in line with the philosophy of total quality management.

- We conduct improvement activities to better perform each work better than the day before.

HEALTH, SAFETY AND ENVIRONMENT POLICY

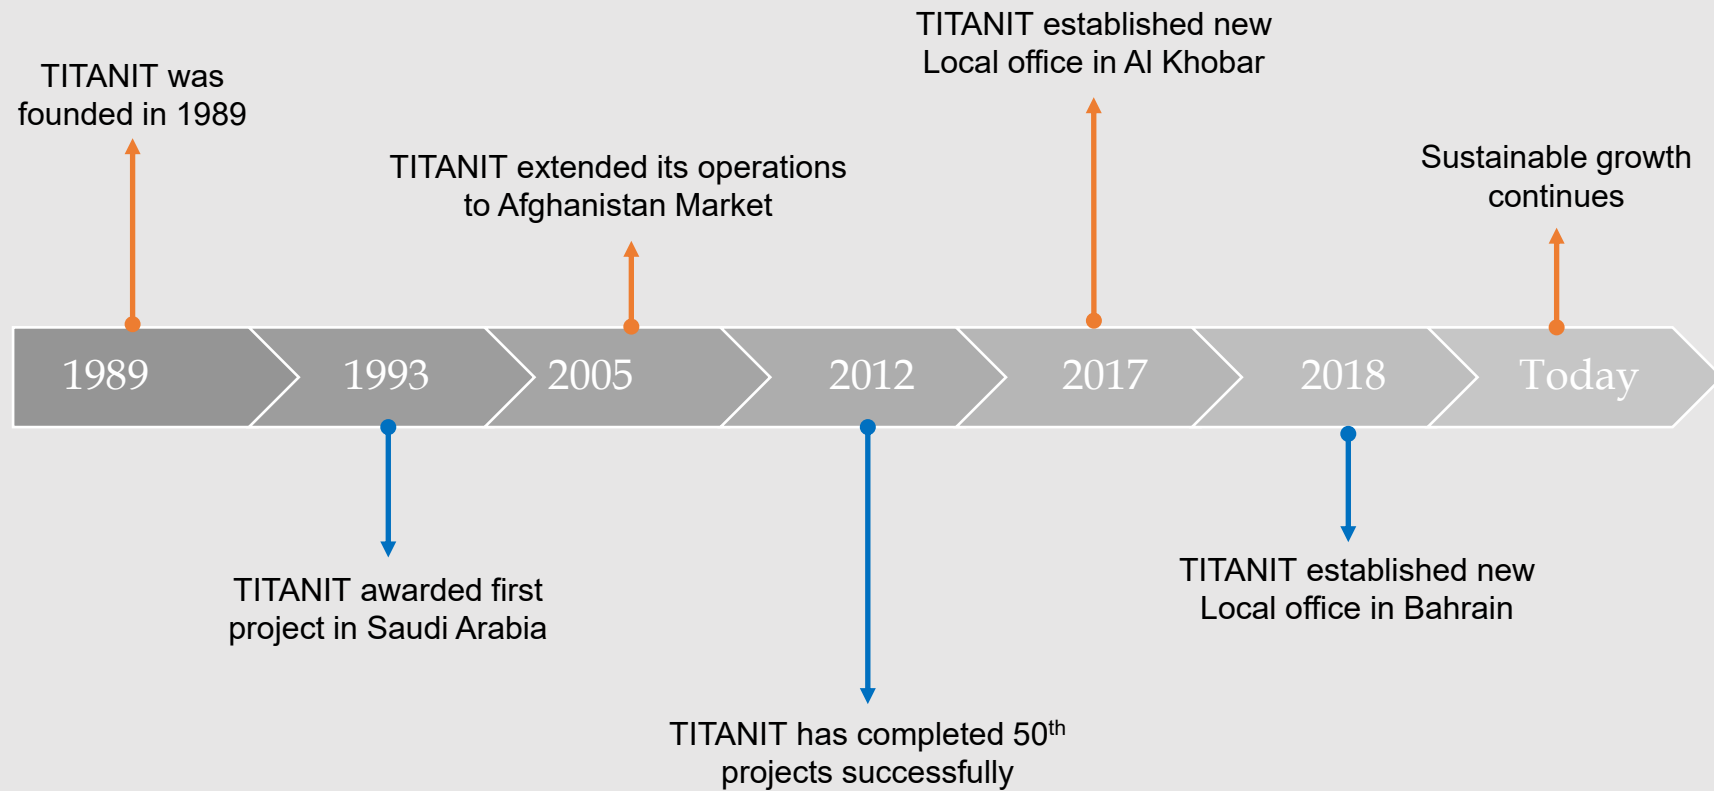

Titanit has Safety, Health and Environment program which has been specifically formulated in consistent with standards to suit (TITANIT)'s work. This program is primarily aimed at elimination of work associated hazards, unsafe work practices and recognizing it as an effective tool for preventing occupational accidents, injuries and property losses. Where required, appropriate supplementary instructions/procedures will be developed at site and enforced in consultation with CLIENT, to meet job specific requirements on health, safety, security and environmental concerns during the performance of work.

It is the main responsibility and objective of TITANIT Site Managers and Line Supervisors to jointly enforce this program with the work force.

Should a conflict or discrepancy between this program and CLIENT, arises during the implementation process; the latter shall prevail and supersede this Safety, Health and Environment Program.
